Career Objective

To secure a responsible position where I can utilize my skills and education for organizational and personal growth while gaining hands-on experience in a dynamic environment.

Education

KL University, Bachelor Of Technology; CSE-Honors with CGPA:9.4

2022 – 2026 | Guntur, AP, India

Specialized in **Data Science and Big Data Analytics**. Completed Mern Full Stack, Python Full Stack and Java Full Stack Web developments. Relevant course works: Data Structures & Algorithms, OOP, Database Systems, Distributed Computing, Machine Learning.

Professional Experience

Full-time Intern, Digineous Pvt Ltd

01/2026 – 06/2026 | Pune, Maharashtra

- Architected reusable React.js component libraries and implemented skeleton loading screens across 3 enterprise platforms (CMMS, CRM), improving cross-device UI consistency by 85% and cutting frontend development time by 30%.
- Designed and integrated RESTful API communication layer across enterprise frontends; led 60% of performance optimization efforts including component reuse, code refactoring, and lazy loading — reducing average page load times by 35%.
- Owned 70% of UI/UX redesign for operations and field-team workflows in a distributed multi-tier system, reducing user navigation friction by 40% and improving system usability at scale.

Research Data Science Intern, All India Institute of Medical Sciences (AIIMS)

2024 – 2025 | Mangalagiri, India

- Built and maintained a structured speech corpus of 300+ stroke patient records, architecting a robust data collection pipeline in live clinical environments ensuring data integrity for downstream ML model ingestion.
- Led speech segmentation end-to-end for 2 of 3 phases (100% ownership per phase), contributing 60% of total segmentation effort using WavSurfer applying boundary detection, silence trimming, and feature labeling.
- Designed phonologically rich recording scripts covering targeted vowels, consonant sounds, and structured sentences to maximize linguistic coverage across 300+ samples for dysarthric speech classification model training.

Skills

Programming Languages: Python, JavaScript, Java, C, HTML/CSS, SQL | **Databases:** MongoDB, PostgreSQL, MySQL |

Frameworks & Libraries: React.js, Node.js, Express.js, Django, Flask, pandas, NumPy, scikit-learn (Random Forest, joblib)

Systems & Tools: RESTful API design, Git, distributed systems concepts, lazy loading, component reusability, code profiling

CS Fundamentals: OOP, algorithm design & complexity analysis, data structures, relational modeling, ML pipelines

Projects

Big Data in Climate Agriculture - Python, Flask, Random Forest, pandas/NumPy, REST APIs

2025

- Engineered a multi-variable climate forecasting system incorporating crop-specific yield constants, state-level multipliers, and time-series temperature/rainfall degradation factors delivering dynamic agricultural predictions via a responsive frontend across 9+ crops and Indian states through 2030.
- Built a Flask-based prediction web app with RESTful APIs integrating a Random Forest regression model (scikit-learn/joblib), demonstrating end-to-end ML pipeline deployment: data ingestion → feature engineering → model serving → API layer.

AI Powered Legal Documentation Assistant - React.js, REST APIs, LLM, NLP - at Smart India Hackathon

2025

- Co-built an AI-powered legal document assistant using React, REST APIs, and a custom-trained LLM fine-tuned on Indian legal documents and constitutional articles — handling legal query resolution and intelligent document summarization.
- Implemented NLP-based prompt engineering features for context-aware legal information retrieval, demonstrating ability to work with ambiguous problem domains and deliver production-quality AI-powered solutions under hackathon constraints.

Certificates

Google Cloud Practitioner - 2025 ☑ | Wipro TalentNext Java Full Stack - 2025 ☑ | LinguaSkill Business English Certificate - 2025 ☑

Extension Activites

President at School of Data Science Club at KL University

2024 – 2025

- Organizing workshops, hackathons, and mentorship programs to enhance students' skills
